Proposal Planner

1. What problem, issue, or policy do you propose to work on?

The problem I propose to work on is drug laws and drug related crimes. Lives are lost and innocent people serve time in prison because of drugs. Neighborhoods are ruined and gangs flourish because of the distributing of drugs. There are not enough laws to minimize drug related crimes.

2. Provide three claims as to why you believe this is a problem, and describe how each claim effects people in your community.

I believe that this is a problem because thousands of lives are lost because of drug related crimes. Some people get unfair punishment because of drugs. One reason gang violence is still not at bay is because of drugs. Also drug dealers are not being punished enough.

3. How is the problem or issue related to policy?

As you take civic actions, you'll need to deal with public policy in some way. Write a paragraph that explains how your issue is related to public policy. Provide facts and details that demonstrate the policy connection.

4. Why do you want to work on this? Why do you think it is important? Introduce your claim, supply relevant information and evidence, and provide a concluding statement.

I want to work on this because drugs are the reason for the death of thousands. Some drugs don't have bad effects on people and some may say they should be legal, but they're not. I feel that if there is no way to legalize certain drugs that the laws against them should be better enforced to decrease violence. More money should be spent on law enforcement. If drug laws were better enforced people would feel safer and lives would be saved.
